

All students will need the following equipment and materials **prior** to their first lesson. We request that parents rent or purchase instruments from this list only! The professionals on our staff have found these instruments to be of a high quality and are suitable for elementary age children. Stringed instruments should not be purchased as children will need larger instruments as they grow. Parents who are experiencing financial problems should indicate this on the registration form by checking the box so as to be considered for a school rental. For the development of good posture and breath support, the purchase of a music stand for each child's home practice is essential. We recommend that instruments be delivered to the school in September so students may be shown proper handling and care.
