

DISTRICT GOALS FOR SCHOOL OPERATIONS

P0220

Long term goals for school operations are essential to ensure that the Board of Education meet its responsibilities for maintenance and operation of the District's schools. A long range plan for maintenance and operations that is continuously evaluated and updated will be developed by the Assistant Superintendent for Support Services, reviewed by the Superintendent of Schools, and reported to the Board of Education when a change in policy or other action is deemed necessary for the improved operation of the school system.

Board of Education policy-making with regard to school operations and maintenance should be guided by the development of long range plans and goal-setting. School operations goals should be consistent with instructional goals and objectives.
