ADMINISTER MEDICATION AS ORDERED AND CALL 911 !!			
Preferred hospital if transported:			
Epinephrine provides a 20 min response window. After epinephrine, the student may feel dizzy and/or have an increased heart rate. This is a normal response. Students receiving epinephrine may be transported to the hospital by ambulance. A staff member should accompany the student to the emergency room if the parent/ guardian is not present.			
$\Box$ The student should be permitted to carry their medication on their person, or leave in a locker, as we consider			
them responsible. He/ she has been instructed in the use of their medication. *			
The medication should be kept in the school nurse's office * (*Both may be checked as			
needed)
